

Proactive Risk Capabilities Statement

Company Overview: Proactive Risk Inc. is a Service-Disabled Veteran-Owned Small Business (SDVOSB) established in 2001, that specializes in comprehensive cybersecurity and risk management solutions. Our mission is to proactively identify, assess, and mitigate potential threats, ensuring the security and resilience of your organization's operations and data.

Core Capabilities:

1. Cybersecurity Services:

- **Vulnerability Assessment and Penetration Testing (VAPT):** Utilizing our CATScanSM service, we provide continuous analysis of threat surfaces for cyber assets and nodes. This includes thorough penetration testing, threat modeling, and security audits to identify and rectify vulnerabilities before they can be exploited.
- **Managed Network and Infrastructure Security:** Our MANAGEITSM service ensures continuous monitoring and management of IT systems, improving system reliability and performance. This includes proactive monitoring, comprehensive IT support, helpdesk services, and backup as a service to safeguard your data.
- **Virtual Chief Information Security Officer (vCISO):** Offering fractional expertise to provide strategic cybersecurity guidance, technology recommendations, compliance and governance support, and regular security audits and assessments.

2. Incident Response Planning:

- We equip your business with a resilient plan to respond effectively to security incidents, minimizing potential damage and ensuring quick recovery.

3. Compliance Management:

- Our Compliance as a Service (CaaS) helps organizations navigate complex regulatory landscapes, including compliance with laws such as the New Jersey Data Breach Notification Law, New York SHIELD Act, HIPAA, and more. We simplify compliance management to safeguard sensitive data and minimize risks associated with non-compliance.

4. Supply Chain Risk Management (SCRM):

- Proactive Risk empowers entities in critical manufacturing sectors to anticipate and dynamically respond to disruptions, ensuring the integrity and continuity of operations.

5. Employee Training and Awareness:

- We educate staff on cybersecurity best practices, including recognizing and avoiding threats like phishing attacks, to enhance your organization's overall security posture.
