

With over two decades of experience, our consultants have successfully guided companies, large and small, including top-tier global water utilities.

### **Urgent Need for Enhanced Cybersecurity:**

Given the evolving threats, we recognize the pressing need to assist water and wastewater municipalities, both large and small, in developing robust IT risk and cybersecurity strategies.

Our aim is to become your trusted advisor and long-term strategic partner, enhancing the strength of your IT Risk and Cybersecurity initiatives. We plan to achieve this by conducting industry-standard assessments to thoroughly understand your present risk landscape. This will lead us to provide you with clear, actionable insights and a customized plan designed to address and mitigate these challenges effectively.

### **Partnership and Expertise:**

We provide comprehensive readiness assessments and help in preparing for regulatory responses at both federal and state levels. Our experienced and skilled team is prepared to join forces with your in-house team to develop a secure and resilient security program. With a vast background in securing critical infrastructures in the financial sector, Operational Technology/Industrial Control Systems (OT/ICS), and SCADA systems, we also offer significant insights. These insights stem from our active participation in leading industry forums such as the National Association of Water Companies (NAWC), Water Information Sharing and Analysis Center (Water ISAC), American Water Works Association (AWWA), and the Environmental Protection Agency (EPA).

### **How We Serve You:**

Our services start with tailored assessments, crafted according to industry standards and focused on your unique requirements. Included in our toolkit are:

- Utilizing the EPA Water Cybersecurity Assessment Tool.
- Compliance with the NJ Mandated Water Quality Accountability Act (WQAA).
- Crafting Cybersecurity Policies and Procedures.
- Conducting ICS Maturity Assessments for SCADA environments.
- Technical Reviews of current infrastructure.
- Creating a Custom-Tailored Cybersecurity Roadmap for municipal utilities.
- Offering Value-Added Assistance with CISA's "Cyber Hygiene Services".
- Conducting Employee Security Awareness Training.
- Providing guidance on securing Government Grants for Cybersecurity Investments.
- Offering Virtual Chief Information Security Officer (vCISO) services.
- Assisting with Regulatory Filings, including WQAA.
- Implementing Incident Response Procedures & facilitating Tabletop Cyber Simulation Exercises.
